# Setting up Google Authenticator

Google Authenticator is an app that allows immediate access into any system requiring two-factor authentication.

Find Google Authenticator in the app store of your phone or tablet.

Once downloaded, set itaside and log into MNDRIVE.

1. Click on your name in the upper left corner
2. Click 'My Profile'
3. Click on your Security Code Type and change to Email and OTP

4. Click 'View QR Code' and open up Google Authenticator
5. When asked, scan the QR code within the Google Authenticator application
6. Finalize any setups within the application
